

Chadwell St Mary

Thurrock

Client: Bloor Homes Eastern

AM-P are currently promoting a large strategic site to the east of Chadwell St Mary through the Thurrock Local Plan process, for a potential urban extension. AM-P have prepared a series of representations including an indicative masterplan to demonstrate how the site could be developed to provide for approximately 4,000 much needed homes and provide important social infrastructure.

AM-P are working closely with the Council to create a comprehensive and sustainable scheme which integrates the existing site characteristics and landscape features. The creation of a new community will strengthen and stimulate the local economy by creating new jobs and overall growth. It is envisaged that the proposals will also support the wider regeneration of Chadwell St Mary area one of the most deprived in Thurrock.

Indicative Masterplan - AM-P
