

# Land at East Harlow

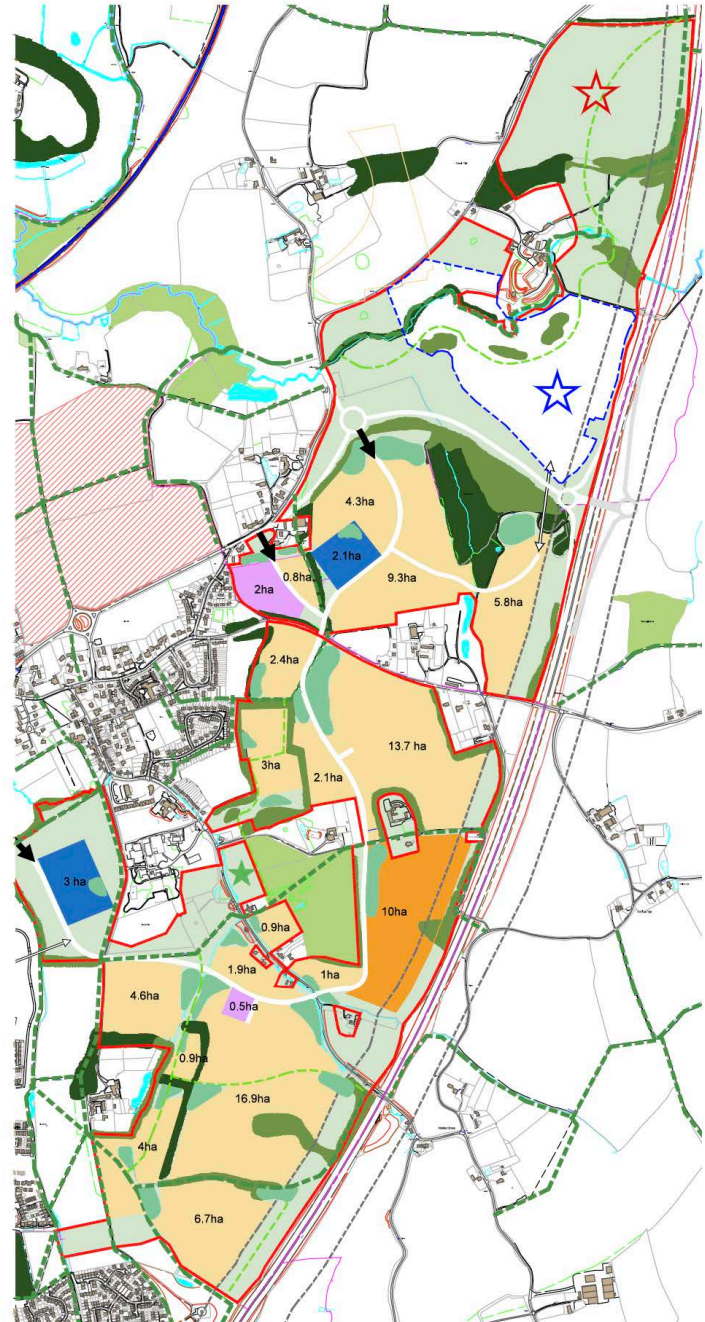

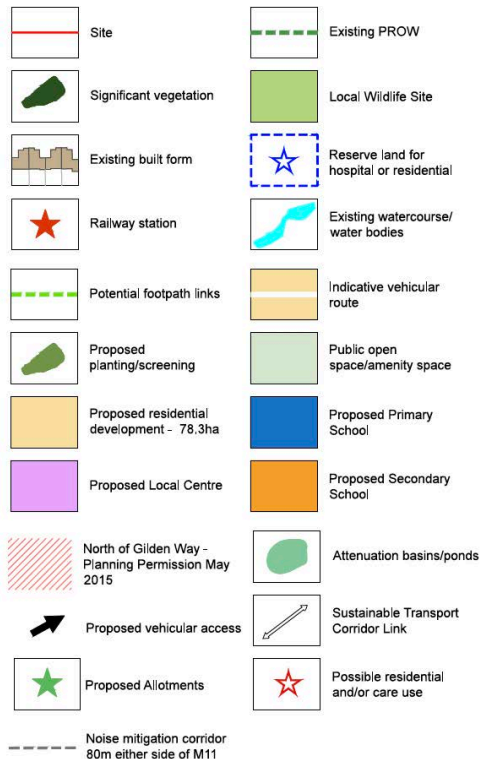

Essex

Client: Miller Homes

For several years AM-P has been leading the strategic promotion of a large cross-boundary site to the East of Harlow. This has involved providing planning and urban design expertise, and resulted in a draft allocation for Green Belt release and comprehensive development in both the Harlow and Epping Forest Local Plans in 2017/18.

Plans for the site include 3,350 dwellings, two primary and one secondary school, local centres, a new M11 motorway junction (J7a) and a potential new campus for the Princess Alexandra Hospital.

This project is likely to involve a Strategic Masterplan Document and a major planning application (including EIA) in due course.
